

# Mapping NIST-CSF Functions to Cybersecurity Products/ Services for Your Portfolio

## IDENTIFY

Remote Monitoring and Management (RMM)

Network/  
Systems  
Discovery

Continuous Vulnerability Scanning

Documentation System

## PROTECT

Antivirus\*

Security Awareness Training

System Hardening

Network Segmentation

Backup systems (SaaS / cloud / on-premise)

Application Allow Listing

Anti-Spam/  
Anti-Phishing

## DETECT

Endpoint Detection and Response\* (EDR)/ Extended Detection and Response (XDR)

Threat Hunting

Network Scanning

Security Information Event Management (SIEM)

SaaS Monitoring

Deception Technologies

Data Loss Prevention

## RESPOND

Security Operations Centers (SOC)

Security Orchestration and Response (SOAR)

## RECOVER

Communication Systems

\*Some EDR vendors/solutions will include antivirus capabilities as well.
