

Dream IT Discussion Guide

This discussion guide can be used with the Dream IT video or the Dream IT slide deck.

The questions can be asked after the video or at key points during the video.

Please be sure to include your story – how you use IT or how you got into the industry. Your personalised story will help connect to the group.

- What in the video surprised you?
- Before the video if I asked you to picture a technology worker, what would you have said?
- If I asked you to picture a technology worker after the video how would your answer change?
- Have you heard of the skills gap? How might this impact you and your future?
- What are some of your strengths and interest areas?
- Based on what you know already and what you saw in the video, how might your interest area relate to IT?
- Try to think of a profession or job that is not related to IT. For each job, ask the group to think of ways that this job is related to IT.
- What was your reaction to seeing mostly women in the video?
- Did any of you like it? What did you like about it?
- Were any of you uncomfortable, perhaps felt left out? Do you think people from minority groups might feel this way when they watch videos and movies?
