

Patrick Burgess

I am an enthusiastic, passionate IT professional with over 10 years experience in senior decision-making positions. In 2011 I co-founded Nutbourne Ltd which provides Managed IT Services across a broad spectrum of business. In my role as Technical Director & Head of Security, I am responsible for ensuring that Nutbourne's clients have efficient and secure technical infrastructure, which supports the business need. I work with our clients to define clear security roadmaps, which are aligned to best practice and can be implemented to reduce the risk profile.

In 2019, I founded Cybxx Consulting alongside my work at Nutbourne Ltd. Cybxx has the simple aim of providing best practice IT Security, Business Continuity and Emergency Response advice to business, both big and small. The current IT Security market is confused, evolving and non-aligned. Cybxx works to translate the advice from trusted sources such as NCSC, NIST and BCS into clear and understandable forms, which can be applied using the right tools for the right job.

I believe that high quality service, security & support are not mutually exclusive and clear communication is key. As a Chartered Member of the British Computer Society, I aim to constantly try to drive standards forward within the IT industry. The best way to expand your knowledge is to surround yourself with people who know more than you and are enthusiastic about what they do. <https://www.linkedin.com/in/patrickkburgess/>
