

CompTIA A+ Certification Exam Core 2 Objectives

EXAM NUMBER: CORE 2 (220-1102)

About the Exam

Candidates are encouraged to use this document to help prepare for the CompTIA A+ 220-1102 certification exam. In order to receive the CompTIA A+ certification, you must pass two exams: Core 1 (220-1101) and Core 2 (220-1102). The CompTIA A+ Core 1 (220-1101) and Core 2 (220-1102) certification exams will verify the successful candidate has the knowledge and skills required to:

- Install, configure, and maintain computer equipment, mobile devices, and software for end users
- Service components based on customer requirements
- Understand networking basics and apply basic cybersecurity methods to mitigate threats
- Properly and safely diagnose, resolve, and document common hardware and software issues
- Apply troubleshooting skills and provide customer support using appropriate communication skills
- Understand the basics of scripting, cloud technologies, virtualization, and multi-OS deployments in corporate environments

This is equivalent to 12 months of hands-on experience working in a help desk support, desktop support technician, or field service technician job role. These content examples are meant to clarify the test objectives and should not be construed as a comprehensive listing of all the content of this examination.

EXAM ACCREDITATION

The CompTIA A+ Core 2 (220-1102) exam is accredited by ANSI to show compliance with the ISO 17024 standard and, as such, undergoes regular reviews and updates to the exam objectives.

EXAM DEVELOPMENT

CompTIA exams result from subject-matter expert workshops and industry-wide survey results regarding the skills and knowledge required of an entry-level IT professional.

CompTIA AUTHORIZED MATERIALS USE POLICY

CompTIA Certifications, LLC is not affiliated with and does not authorize, endorse, or condone utilizing any content provided by unauthorized third-party training sites (aka “brain dumps”). Individuals who utilize such materials in preparation for any CompTIA examination will have their certifications revoked and be suspended from future testing in accordance with the CompTIA Candidate Agreement. In an effort to more clearly communicate CompTIA’s exam policies on use of unauthorized study materials, CompTIA directs all certification candidates to the [CompTIA Certification Exam Policies](#). Please review all CompTIA policies before beginning the study process for any CompTIA exam. Candidates will be required to abide by the [CompTIA Candidate Agreement](#). If a candidate has a question as to whether study materials are considered unauthorized (aka “brain dumps”), he/she should contact CompTIA at examsecurity@comptia.org to confirm.

PLEASE NOTE

The lists of examples provided in bulleted format are not exhaustive lists. Other examples of technologies, processes, or tasks pertaining to each objective may also be included on the exam, although not listed or covered in this objectives document. CompTIA is constantly reviewing the content of our exams and updating test questions to be sure our exams are current, and the security of the questions is protected. When necessary, we will publish updated exams based on existing exam objectives. Please know that all related exam preparation materials will still be valid.

TEST DETAILS

Required exam	A+ Core 2 (220-1102)
Number of questions	Maximum of 90
Types of questions	Multiple-choice and performance-based
Length of test	90 minutes
Recommended experience	12 months of hands-on experience in a help desk support technician, desktop support technician, or field service technician job role
Passing score	700 (on a scale of 100-900)

EXAM OBJECTIVES (DOMAINS)

The table below lists the domains measured by this examination and the extent to which they are represented.

DOMAIN		PERCENTAGE OF EXAMINATION
1.0	Operating Systems	31%
2.0	Security	25%
3.0	Software Troubleshooting	22%
4.0	Operational Procedures	22%
Total		100%

NOTE ON WINDOWS 11

Versions of Microsoft® Windows® that are not end of Mainstream Support (as determined by Microsoft), up to and including Windows 11, are intended content areas of the certification. As such, objectives in which a specific version of Microsoft Windows is not indicated in the main objective title can include content related to Windows 10 and Windows 11, as it relates to the job role.

1.0 Operating Systems

1.1 Identify basic features of Microsoft Windows editions.

- **Windows 10 editions**
 - Home
 - Pro
 - Pro for Workstations
 - Enterprise
- **Feature differences**
 - Domain access vs. workgroup
 - Desktop styles/user interface
 - Availability of Remote Desktop Protocol (RDP)
 - Random-access memory (RAM) support limitations
 - BitLocker
 - gpedit.msc
- **Upgrade paths**
 - In-place upgrade

1.2 Given a scenario, use the appropriate Microsoft command-line tool.

- **Navigation**
 - cd
 - dir
 - md
 - rmdir
 - Drive navigation inputs:
 - C: or D: or x:
- **Command-line tools**
 - ipconfig
 - ping
 - hostname
 - netstat
 - nslookup
 - chkdsk
 - net user
 - net use
 - tracert
 - format
 - xcopy
 - copy
 - robocopy
 - gpupdate
 - gpreult
 - shutdown
 - sfc
 - [command name] /?
 - diskpart
 - pathping
 - winver

1.3 Given a scenario, use features and tools of the Microsoft Windows 10 operating system (OS).

- **Task Manager**
 - Services
 - Startup
 - Performance
 - Processes
 - Users
 - **Microsoft Management Console (MMC) snap-in**
 - Event Viewer (eventvwr.msc)
 - Disk Management (diskmgmt.msc)
 - Task Scheduler (taskschd.msc)
 - Device Manager (devmgmt.msc)
 - Certificate Manager (certmgr.msc)
 - Local Users and Groups (lusrmgr.msc)
 - Performance Monitor (perfmon.msc)
 - Group Policy Editor (gpedit.msc)
 - **Additional tools**
 - System Information (msinfo32.exe)
 - Resource Monitor (resmon.exe)
 - System Configuration (msconfig.exe)
 - Disk Cleanup (cleanmgr.exe)
 - Disk Defragment (dfrgui.exe)
 - Registry Editor (regedit.exe)
-

1.4 Given a scenario, use the appropriate Microsoft Windows 10 Control Panel utility.

- **Internet Options**
- **Devices and Printers**
- **Programs and Features**
- **Network and Sharing Center**
- **System**
- **Windows Defender Firewall**
- **Mail**
- **Sound**
- **User Accounts**
- **Device Manager**
- **Indexing Options**
- **Administrative Tools**
- **File Explorer Options**
 - Show hidden files
 - Hide extensions
 - General options
 - View options
- **Power Options**
 - Hibernate
 - Power plans
 - Sleep/suspend
 - Standby
 - Choose what closing the lid does
 - Turn on fast startup
 - Universal Serial Bus (USB) selective suspend
- **Ease of Access**

1.5 Given a scenario, use the appropriate Windows settings.

- Time and Language
 - Update and Security
 - Personalization
 - Apps
 - Privacy
 - System
 - Devices
 - Network and Internet
 - Gaming
 - Accounts
-

1.6 Given a scenario, configure Microsoft Windows networking features on a client/desktop.

- **Workgroup vs. domain setup**
 - Shared resources
 - Printers
 - File servers
 - Mapped drives
 - **Local OS firewall settings**
 - Application restrictions and exceptions
 - Configuration
 - **Client network configuration**
 - Internet Protocol (IP) addressing scheme
 - Domain Name System (DNS) settings
 - Subnet mask
 - Gateway
 - Static vs. dynamic
 - **Establish network connections**
 - Virtual private network (VPN)
 - Wireless
 - Wired
 - Wireless wide area network (WWAN)
 - **Proxy settings**
 - **Public network vs. private network**
 - **File Explorer navigation – network paths**
 - **Metered connections and limitations**
-

1.7 Given a scenario, apply application installation and configuration concepts.

- **System requirements for applications**
 - 32-bit vs. 64-bit dependent application requirements
 - Dedicated graphics card vs. integrated
 - Video random-access memory (VRAM) requirements
 - RAM requirements
 - Central processing unit (CPU) requirements
 - External hardware tokens
 - Storage requirements
- **OS requirements for applications**
 - Application to OS compatibility
 - 32-bit vs. 64-bit OS
- **Distribution methods**
 - Physical media vs. downloadable
 - ISO mountable
- **Other considerations for new applications**
 - Impact to device
 - Impact to network
 - Impact to operation
 - Impact to business

1.8 Explain common OS types and their purposes.

- **Workstation OSs**
 - Windows
 - Linux
 - macOS
 - Chrome OS
 - **Cell phone/tablet OSs**
 - iPadOS
 - iOS
 - Android
 - **Various filesystem types**
 - New Technology File System (NTFS)
 - File Allocation Table 32 (FAT32)
 - Third extended filesystem (ext3)
 - Fourth extended filesystem (ext4)
 - Apple File System (APFS)
 - Extensible File Allocation Table (exFAT)
 - **Vendor life-cycle limitations**
 - End-of-life (EOL)
 - Update limitations
 - **Compatibility concerns between OSs**
-

1.9 Given a scenario, perform OS installations and upgrades in a diverse OS environment.

- **Boot methods**
 - USB
 - Optical media
 - Network
 - Solid-state/flash drives
 - Internet-based
 - External/hot-swappable drive
 - Internal hard drive (partition)
- **Types of installations**
 - Upgrade
 - Recovery partition
 - Clean install
 - Image deployment
 - Repair installation
 - Remote network installation
 - Other considerations
 - Third-party drivers
- **Partitioning**
 - GUID [globally unique identifier] Partition Table (GPT)
 - Master boot record (MBR)
- **Drive format**
- **Upgrade considerations**
 - Backup files and user preferences
 - Application and driver support/backward compatibility
 - Hardware compatibility
- **Feature updates**
 - Product life cycle

1.10 Identify common features and tools of the macOS/desktop OS.

- **Installation and uninstallation of applications**
 - File types
 - .dmg
 - .pkg
 - .app
 - App Store
 - Uninstallation process
 - **Apple ID and corporate restrictions**
 - **Best practices**
 - Backups
 - Antivirus
 - Updates/patches
 - **System Preferences**
 - Displays
 - Networks
 - Printers
 - Scanners
 - Privacy
 - Accessibility
 - Time Machine
 - **Features**
 - Multiple desktops
 - Mission Control
 - Keychain
 - Spotlight
 - iCloud
 - Gestures
 - Finder
 - Remote Disc
 - Dock
 - **Disk Utility**
 - **FileVault**
 - **Terminal**
 - **Force Quit**
-

1.11 Identify common features and tools of the Linux client/desktop OS.

- **Common commands**
 - ls
 - pwd
 - mv
 - cp
 - rm
 - chmod
 - chown
 - su/sudo
 - apt-get
 - yum
- ip
 - df
 - grep
 - ps
 - man
 - top
 - find
 - dig
 - cat
 - nano
- **Best practices**
 - Backups
 - Antivirus
 - Updates/patches
- **Tools**
 - Shell/terminal
 - Samba

2.0 Security

2.1 Summarize various security measures and their purposes.

- **Physical security**
 - Access control vestibule
 - Badge reader
 - Video surveillance
 - Alarm systems
 - Motion sensors
 - Door locks
 - Equipment locks
 - Guards
 - Bollards
 - Fences
- **Physical security for staff**
 - Key fobs
 - Smart cards
 - Keys
 - Biometrics
- **Logical security**
 - Retina scanner
 - Fingerprint scanner
 - Palmprint scanner
 - Lighting
 - Magnetometers
 - Principle of least privilege
 - Access control lists (ACLs)
 - Multifactor authentication (MFA)
 - Email
 - Hard token
 - Soft token
 - Short message service (SMS)
 - Voice call
 - Authenticator application
- **Mobile device management (MDM)**
- **Active Directory**
 - Login script
 - Domain
 - Group Policy/updates
 - Organizational units
 - Home folder
 - Folder redirection
 - Security groups

2.2 Compare and contrast wireless security protocols and authentication methods.

- **Protocols and encryption**
 - WiFi Protected Access 2 (WPA2)
 - WPA3
 - Temporal Key Integrity Protocol (TKIP)
 - Advanced Encryption Standard (AES)
- **Authentication**
 - Remote Authentication Dial-In User Service (RADIUS)
 - Terminal Access Controller Access-Control System (TACACS+)
 - Kerberos
 - Multifactor

2.3 Given a scenario, detect, remove, and prevent malware using the appropriate tools and methods.

- **Malware**
 - Trojan
 - Rootkit
 - Virus
 - Spyware
 - Ransomware
 - Keylogger
 - Boot sector virus
 - Cryptominers
 - **Tools and methods**
 - Recovery mode
 - Antivirus
 - Anti-malware
 - Software firewalls
 - Anti-phishing training
 - User education regarding common threats
 - OS reinstallation
-

2.4 Explain common social-engineering attacks, threats, and vulnerabilities.

- **Social engineering**
 - Phishing
 - Vishing
 - Shoulder surfing
 - Whaling
 - Tailgating
 - Impersonation
 - Dumpster diving
 - Evil twin
- **Threats**
 - Distributed denial of service (DDoS)
 - Denial of service (DoS)
 - Zero-day attack
 - Spoofing
 - On-path attack
 - Brute-force attack
 - Dictionary attack
 - Insider threat
 - Structured Query Language (SQL) injection
 - Cross-site scripting (XSS)
- **Vulnerabilities**
 - Non-compliant systems
 - Unpatched systems
 - Unprotected systems (missing antivirus/missing firewall)
 - EOL OSs
 - Bring your own device (BYOD)

2.5 Given a scenario, manage and configure basic security settings in the Microsoft Windows OS.

- **Defender Antivirus**
 - Activate/deactivate
 - Updated definitions
 - **Firewall**
 - Activate/deactivate
 - Port security
 - Application security
 - **Users and groups**
 - Local vs. Microsoft account
 - Standard account
 - Administrator
 - Guest user
 - Power user
 - **Login OS options**
 - Username and password
 - Personal identification number (PIN)
 - Fingerprint
 - Facial recognition
 - Single sign-on (SSO)
 - **NTFS vs. share permissions**
 - File and folder attributes
 - Inheritance
 - **Run as administrator vs. standard user**
 - User Account Control (UAC)
 - **BitLocker**
 - **BitLocker To Go**
 - **Encrypting File System (EFS)**
-

2.6 Given a scenario, configure a workstation to meet best practices for security.

- **Data-at-rest encryption**
 - **Password best practices**
 - Complexity requirements
 - Length
 - Character types
 - Expiration requirements
 - Basic input/output system (BIOS)/Unified Extensible Firmware Interface (UEFI) passwords
 - **End-user best practices**
 - Use screensaver locks
 - Log off when not in use
 - Secure/protect critical hardware (e.g., laptops)
 - Secure personally identifiable information (PII) and passwords
 - **Account management**
 - Restrict user permissions
 - Restrict login times
 - Disable guest account
 - Use failed attempts lockout
 - Use timeout/screen lock
 - **Change default administrator's user account/password**
 - **Disable AutoRun**
 - **Disable AutoPlay**
-

2.7 Explain common methods for securing mobile and embedded devices.

- **Screen locks**
 - Facial recognition
 - PIN codes
 - Fingerprint
 - Pattern
 - Swipe
- **Remote wipes**
- **Locator applications**
- **OS updates**
- **Device encryption**
- **Remote backup applications**
- **Failed login attempts restrictions**
- **Antivirus/anti-malware**
- **Firewalls**
- **Policies and procedures**
 - BYOD vs. corporate owned
 - Profile security requirements
- **Internet of Things (IoT)**

2.8 Given a scenario, use common data destruction and disposal methods.

- **Physical destruction**
 - Drilling
 - Shredding
 - Degaussing
 - Incinerating
 - **Recycling or repurposing best practices**
 - Erasing/wiping
 - Low-level formatting
 - Standard formatting
 - **Outsourcing concepts**
 - Third-party vendor
 - Certification of destruction/recycling
-

2.9 Given a scenario, configure appropriate security settings on small office/home office (SOHO) wireless and wired networks.

- **Home router settings**
 - Change default passwords
 - IP filtering
 - Firmware updates
 - Content filtering
 - Physical placement/secure locations
 - Dynamic Host Configuration Protocol (DHCP) reservations
 - Static wide-area network (WAN) IP
 - Universal Plug and Play (UPnP)
 - Screened subnet
 - **Wireless specific**
 - Changing the service set identifier (SSID)
 - Disabling SSID broadcast
 - Encryption settings
 - Disabling guest access
 - Changing channels
 - **Firewall settings**
 - Disabling unused ports
 - Port forwarding/mapping
-

2.10 Given a scenario, install and configure browsers and relevant security settings.

- **Browser download/installation**
 - Trusted sources
 - Hashing
 - Untrusted sources
- **Extensions and plug-ins**
 - Trusted sources
 - Untrusted sources
- **Password managers**
- **Secure connections/sites - valid certificates**
- **Settings**
 - Pop-up blocker
 - Clearing browsing data
 - Clearing cache
 - Private-browsing mode
 - Sign-in/browser data synchronization
 - Ad blockers

3.0 Software Troubleshooting

3.1 Given a scenario, troubleshoot common Windows OS problems.

- **Common symptoms**
 - Blue screen of death (BSOD)
 - Sluggish performance
 - Boot problems
 - Frequent shutdowns
 - Services not starting
 - Applications crashing
 - Low memory warnings
 - USB controller resource warnings
 - System instability
 - No OS found
 - Slow profile load
 - Time drift
- **Common troubleshooting steps**
 - Reboot
 - Restart services
 - Uninstall/reinstall/update applications
 - Add resources
 - Verify requirements
 - System file check
 - Repair Windows
 - Restore
 - Reimage
 - Roll back updates
 - Rebuild Windows profiles

3.2 Given a scenario, troubleshoot common personal computer (PC) security issues.

- **Common symptoms**
 - Unable to access the network
 - Desktop alerts
 - False alerts regarding antivirus protection
 - Altered system or personal files
 - Missing/renamed files
 - Unwanted notifications within the OS
 - OS update failures
- **Browser-related symptoms**
 - Random/frequent pop-ups
 - Certificate warnings
 - Redirection

3.3 Given a scenario, use best practice procedures for malware removal.

1. Investigate and verify malware symptoms
 2. Quarantine infected systems
 3. Disable System Restore in Windows
 4. Remediate infected systems
 - a. Update anti-malware software
 - b. Scanning and removal techniques (e.g., safe mode, preinstallation environment)
 5. Schedule scans and run updates
 6. Enable System Restore and create a restore point in Windows
 7. Educate the end user
-

3.4 Given a scenario, troubleshoot common mobile OS and application issues.

- **Common symptoms**
 - Application fails to launch
 - Application fails to close/crashes
 - Application fails to update
 - Slow to respond
 - OS fails to update
 - Battery life issues
 - Randomly reboots
 - Connectivity issues
 - Bluetooth
 - WiFi
 - Near-field communication (NFC)
 - AirDrop
 - Screen does not autorotate
-

3.5 Given a scenario, troubleshoot common mobile OS and application security issues.

- **Security concerns**
 - Android package (APK) source
 - Developer mode
 - Root access/jailbreak
 - Bootleg/malicious application
 - Application spoofing
- **Common symptoms**
 - High network traffic
 - Sluggish response time
 - Data-usage limit notification
 - Limited Internet connectivity
 - No Internet connectivity
 - High number of ads
 - Fake security warnings
 - Unexpected application behavior
 - Leaked personal files/data

4.0 Operational Procedures

4.1 Given a scenario, implement best practices associated with documentation and support systems information management.

- **Ticketing systems**
 - User information
 - Device information
 - Description of problems
 - Categories
 - Severity
 - Escalation levels
 - Clear, concise written communication
 - Problem description
 - Progress notes
 - Problem resolution
- **Asset management**
 - Inventory lists
 - Database system
 - Asset tags and IDs
 - Procurement life cycle
 - Warranty and licensing
 - Assigned users
- **Types of documents**
 - Acceptable use policy (AUP)
 - Network topology diagram
 - Regulatory compliance requirements
 - Splash screens
- Incident reports
- Standard operating procedures
 - Procedures for custom installation of software package
- New-user setup checklist
- End-user termination checklist
- **Knowledge base/articles**

4.2 Explain basic change-management best practices.

- **Documented business processes**
 - Rollback plan
 - Sandbox testing
 - Responsible staff member
- **Change management**
 - Request forms
 - Purpose of the change
 - Scope of the change
 - Date and time of the change
 - Affected systems/impact
 - Risk analysis
 - Risk level
 - Change board approvals
 - End-user acceptance

4.3 Given a scenario, implement workstation backup and recovery methods.

- **Backup and recovery**
 - Full
 - Incremental
 - Differential
 - Synthetic
 - **Backup testing**
 - Frequency
 - **Backup rotation schemes**
 - On site vs. off site
 - Grandfather-father-son (GFS)
 - 3-2-1 backup rule
-

4.4 Given a scenario, use common safety procedures.

- **Electrostatic discharge (ESD) straps**
 - **ESD mats**
 - **Equipment grounding**
 - **Proper power handling**
 - **Proper component handling and storage**
 - **Antistatic bags**
 - **Compliance with government regulations**
 - **Personal safety**
 - Disconnect power before repairing PC
 - Lifting techniques
 - Electrical fire safety
 - Safety goggles
 - Air filtration mask
-

4.5 Summarize environmental impacts and local environmental controls.

- **Material safety data sheet (MSDS)/documentation for handling and disposal**
 - Proper battery disposal
 - Proper toner disposal
 - Proper disposal of other devices and assets
- **Temperature, humidity-level awareness, and proper ventilation**
 - Location/equipment placement
 - Dust cleanup
 - Compressed air/vacuums
- **Power surges, under-voltage events, and power failures**
 - Battery backup
 - Surge suppressor

4.6 Explain the importance of prohibited content/activity and privacy, licensing, and policy concepts.

- **Incident response**
 - Chain of custody
 - Inform management/law enforcement as necessary
 - Copy of drive (data integrity and preservation)
 - Documentation of incident
 - **Licensing/digital rights management (DRM)/end-user license agreement (EULA)**
 - Valid licenses
 - Non-expired licenses
 - Personal use license vs. corporate use license
 - Open-source license
 - **Regulated data**
 - Credit card transactions
 - Personal government-issued information
 - PII
 - Healthcare data
 - Data retention requirements
-

4.7 Given a scenario, use proper communication techniques and professionalism.

- **Professional appearance and attire**
 - Match the required attire of the given environment
 - Formal
 - Business casual
- **Use proper language and avoid jargon, acronyms, and slang, when applicable**
- **Maintain a positive attitude/project confidence**
- **Actively listen, take notes, and avoid interrupting the customer**
- **Be culturally sensitive**
 - Use appropriate professional titles, when applicable
- **Be on time (if late, contact the customer)**
- **Avoid distractions**
 - Personal calls
 - Texting/social media sites
 - Personal interruptions
- **Dealing with difficult customers or situations**
 - Do not argue with customers or be defensive
 - Avoid dismissing customer problems
 - Avoid being judgmental
 - Clarify customer statements (ask open-ended questions to narrow the scope of the problem, restate the issue, or question to verify understanding)
 - Do not disclose experience via social media outlets
- **Set and meet expectations/time line and communicate status with the customer**
 - Offer repair/replacement options, as needed
 - Provide proper documentation on the services provided
 - Follow up with customer/user at a later date to verify satisfaction
- **Deal appropriately with customers' confidential and private materials**
 - Located on a computer, desktop, printer, etc.

4.8 Identify the basics of scripting.

- **Script file types**
 - .bat
 - .ps1
 - .vbs
 - .sh
 - .js
 - .py
 - **Use cases for scripting**
 - Basic automation
 - Restarting machines
 - Remapping network drives
 - Installation of applications
 - Automated backups
 - Gathering of information/data
 - Initiating updates
 - **Other considerations when using scripts**
 - Unintentionally introducing malware
 - Inadvertently changing system settings
 - Browser or system crashes due to mishandling of resources
-

4.9 Given a scenario, use remote access technologies.

- **Methods/tools**
 - RDP
 - VPN
 - Virtual network computer (VNC)
 - Secure Shell (SSH)
 - Remote monitoring and management (RMM)
 - Microsoft Remote Assistance (MSRA)
 - Third-party tools
 - Screen-sharing software
 - Video-conferencing software
 - File transfer software
 - Desktop management software
- **Security considerations of each access method**

CompTIA A+ Core 2 (220-1102) Acronym List

The following is a list of acronyms that appear on the CompTIA A+ Core 2 (220-1102) exam. Candidates are encouraged to review the complete list and attain a working knowledge of all listed acronyms as part of a comprehensive exam preparation program.

Acronym	Definition	Acronym	Definition
AAA	Authentication, Authorization, and Accounting	DBaaS	Database as a Service
AC	Alternating Current	DC	Direct Current
ACL	Access Control List	DDoS	Distributed Denial of Service
ADF	Automatic Document Feeder	DDR	Double Data Rate
AES	Advanced Encryption Standard	DHCP	Dynamic Host Configuration Protocol
AP	Access Point	DIMM	Dual Inline Memory Module
APFS	Apple File System	DKIM	DomainKeys Identified Mail
APIPA	Automatic Private Internet Protocol Addressing	DMA	Direct Memory Access
APK	Android Package	DMARC	Domain-based Message Authentication, Reporting, and Conformance
ARM	Advanced RISC [Reduced Instruction Set Computer] Machine	DNS	Domain Name System
ARP	Address Resolution Protocol	DoS	Denial of Service
ATA	Advanced Technology Attachment	DOS	Disk Operating System
ATM	Asynchronous Transfer Mode	DRaaS	Disaster Recovery as a Service
ATX	Advanced Technology Extended	DRAM	Dynamic Random-Access Memory
AUP	Acceptable Use Policy	DRM	Digital Rights Management
AV	Antivirus	DSL	Digital Subscriber Line
BIOS	Basic Input/Output System	DVI	Digital Visual Interface
BSOD	Blue Screen of Death	DVI-D	Digital Visual Interface-Digital
BYOD	Bring Your Own Device	EAP	Extensible Authentication Protocol
CA	Certificate Authority	ECC	Error Correcting Code
CAPTCHA	Completely Automated Public Turing Test to Tell Computers and Humans Apart	EFS	Encrypting File System
CAD	Computer-aided Design	EMI	Electromagnetic Interference
CD	Compact Disc	EOL	End-of-Life
CDFS	Compact Disc File System	eSATA	External Serial Advanced Technology Attachment
CDMA	Code-Division Multiple Access	ESD	Electrostatic Discharge
CERT	Computer Emergency Response Team	EULA	End-User License Agreement
CIFS	Common Internet File System	exFAT	Extensible File Allocation Table
CMD	Command Prompt	ext	Extended File System
CMOS	Complementary Metal-Oxide Semiconductor	FAT	File Allocation Table
CNAME	Canonical Name	FAT12	12-bit File Allocation Table
CPU	Central Processing Unit	FAT16	16-bit File Allocation Table
CRL	Certificate Revocation List	FAT32	32-bit File Allocation Table
DaaS	Data as a Service	FSB	Front-Side Bus
		FTP	File Transfer Protocol
		GFS	Grandfather-Father-Son
		GPS	Global Positioning System

Acronym	Definition	Acronym	Definition
GPT	GUID [Globally Unique Identifier] Partition Table	MFD	Multifunction Device
GPU	Graphics Processing Unit	MFP	Multifunction Printer
GSM	Global System for Mobile Communications	MMC	Microsoft Management Console
GUI	Graphical User Interface	MOU	Memorandum of Understanding
GUID	Globally Unique Identifier	mSATA	Mini-serial Advanced Technology Attachment
HAL	Hardware Abstraction Layer	MSDS	Material Safety Data Sheet
HAV	Hardware-assisted Virtualization	MSP	Managed Service Provider
HCL	Hardware Compatibility List	MSRA	Microsoft Remote Assistance
HDCP	High-bandwidth Digital Content Protection	MTBF	Meantime Between Failure
HDD	Hard Disk Drive	MX	Mail Exchange
HDMI	High-Definition Multimedia Interface	NAC	Network Access Control
HHD	Hybrid Hard Drive	NAS	Network Attached Storage
HSM	Hardware Security Module	NAT	Network Address Translation
HTML	Hypertext Markup Language	NDA	Non-disclosure Agreement
HTTP	Hypertext Transfer Protocol	NetBIOS	Networked Basic Input/Output System
HTTPS	Hypertext Transfer Protocol Secure	NetBT	NetBIOS over TCP/IP [Transmission Control Protocol/Internet Protocol]
I/O	Input/Output	NFC	Near-field Communication
IaaS	Infrastructure as a Service	NFS	Network File System
ICMP	Internet Message Control Protocol	NIC	Network Interface Card
ICR	Intelligent Character Recognition	NTFS	New Technology File System
IDE	Integrated Drive Electronics	NTP	Network Time Protocol
IDS	Intrusion Detection System	NVMe	Non-volatile Memory Express
IEEE	Institute of Electrical and Electronics Engineers	OCR	Optical Character Recognition
IMAP	Internet Mail Access Protocol	OEM	Original Equipment Manufacturer
IOPS	Input/Output Operations Per Second	OLED	Organic Light-emitting Diode
IoT	Internet of Things	ONT	Optical Network Terminal
IP	Internet Protocol	OS	Operating System
IPSec	Internet Protocol Security	PaaS	Platform as a Service
IR	Infrared	PAN	Personal Area Network
IrDA	Infrared Data Association	PC	Personal Computer
IRP	Incident Response Plan	PCI	Payment Card Industry
ISO	International Organization for Standardization	PCIe	Peripheral Component Interconnect Express
ISP	Internet Service Provider	PCL	Printer Command Language
IT	Information Technology	PDU	Power Distribution Unit
ITX	Information Technology eXtended	PE	Preinstallation Environment
KB	Knowledge Base	PEAP	Protected Extensible Protocol
KVM	Keyboard-Video-Mouse	PII	Personally Identifiable Information
LAN	Local Area Network	PIN	Personal Identification Number
LC	Lucent Connector	PKI	Public Key Infrastructure
LCD	Liquid Crystal Display	PoE	Power over Ethernet
LDAP	Lightweight Directory Access Protocol	POP3	Post Office Protocol 3
LEAP	Lightweight Extensible Protocol	POST	Power-on Self-Test
LED	Light-emitting Diode	PPP	Point-to-Point Protocol
LTE	Long Term Evolution	PRL	Preferred Roaming List
MAC	Media Access Control/Mandatory Access Control	PSK	Preshared Key
MAM	Mobile Application Management	PSU	Power Supply Unit
MAN	Metropolitan Area Network	PXE	Preboot Execution Environment
MBR	Master Boot Record	RADIUS	Remote Authentication Dial-in User Service
MDM	Mobile Device Management	RAID	Redundant Array of Independent (or Inexpensive) Disks
MFA	Multifactor Authentication	RAM	Random-access Memory
		RDP	Remote Desktop Protocol

Acronym	Definition	Acronym	Definition
RF	Radio Frequency	SSO	Single Sign-on
RFI	Radio Frequency Interference	ST	Straight Tip
RFID	Radio Frequency Identification	STP	Shielded Twisted Pair
RJ11	Registered Jack Function 11	TACACS	Terminal Access Controller Access-Control System
RJ45	Registered Jack Function 45	TCP	Transmission Control Protocol
RMM	Remote Monitoring and Management	TCP/IP	Transmission Control Protocol/Internet Protocol
RTO	Recovery Time Objective	TFTP	Trivial File Transfer Protocol
S/MIME	Secure/Multipurpose Internet Mail Extensions	TKIP	Temporal Key Integrity Protocol
SaaS	Software as a Service	TLS	Transport Layer Security
SAN	Storage Area Network	TN	Twisted Nematic
SAS	Serial Attached SCSI [Small Computer System Interface]	TPM	Trusted Platform Module
SATA	Serial Advanced Technology Attachment	UAC	User Account Control
SC	Subscriber Connector	UDP	User Datagram Protocol
SCADA	Supervisory Control and Data Acquisition	UEFI	Unified Extensible Firmware Interface
SCP	Secure Copy Protection	UNC	Universal Naming Convention
SCSI	Small Computer System Interface	UPnP	Universal Plug and Play
SD	Secure Digital	UPS	Uninterruptible Power Supply
SDD	Super Density Disk	USB	Universal Serial Bus
SDN	Software-defined Networking	USB-C	Universal Serial Bus Type C
SFTP	Secure File Transfer Protocol	UTM	Unified Threat Management
SIM	Subscriber Identity Module	UTP	Unshielded Twisted Pair
SIMM	Single Inline Memory Module	VA	Vertical Alignment
S.M.A.R.T.	Self-monitoring Analysis and Reporting Technology	VDI	Virtual Desktop Infrastructure
SMB	Server Message Block	VGA	Video Graphics Array
SMS	Short Message Service	VLAN	Virtual LAN [Local Area Network]
SMTP	Simple Mail Transfer Protocol	VM	Virtual Machine
SNMP	Simple Network Management Protocol	VNC	Virtual Network Computer
SNTP	Simple Network Time Protocol	VoIP	Voice over Internet Protocol
SOA	Start of Authority	VPN	Virtual Private Network
SODIMM	Small Outline Dual Inline Memory Module	VRAM	Video Random-access Memory
SOHO	Small Office/Home Office	WAN	Wide Area Network
SOP	Standard Operating Procedure	WAP	Wireless Access Point
SPF	Sender Policy Framework	WEP	Wired Equivalent Privacy
SQL	Structured Query Language	WISP	Wireless Internet Service Provider
SRAM	Static Random-access Memory	WLAN	Wireless LAN [Local Area Network]
SRV	Service	WMN	Wireless Mesh Network
SSD	Solid-state Drive	WPA	WiFi Protected Access
SSH	Secure Shell	WPS	Wi-Fi Protected Service
SSID	Service Set Identifier	WWAN	Wireless Wide Area Network
SSL	Secure Sockets Layer	XSS	Cross-site Scripting

CompTIA A+ Core 2 (220-1102) Proposed Hardware and Software List

**CompTIA has included this sample list of hardware and software to assist candidates as they prepare for the A+ Core 2 (220-1102) exam. This list may also be helpful for training companies that wish to create a lab component to their training offering. The bulleted lists below each topic are sample lists and are not exhaustive.

Equipment

- Apple tablet/smartphone
- Android tablet/smartphone
- Windows tablet
- Chromebook
- Windows laptop/Mac laptop/Linux laptop
- Windows desktop/Mac desktop/Linux desktop
- Windows server with Active Directory and Print Management
- Monitors
- Projectors
- SOHO router/switch
- Access point
- Voice over Internet Protocol (VoIP) phone
- Printer
 - Laser/inkjet
 - Wireless
 - 3-D printer
 - Thermal
- Surge suppressor
- Uninterruptible power supply (UPS)
- Smart devices (Internet of Things [IoT] devices)
- Server with a hypervisor
- Punchdown block
- Patch panel
- Webcams
- Speakers
- Microphones

Spare parts/hardware

- Motherboards
- RAM
- Hard drives
- Power supplies
- Video cards
- Sound cards
- Network cards
- Wireless network interface cards (NICs)
- Fans/cooling devices/heat sink
- CPUs
- Assorted connectors/cables
 - USB
 - High-Definition Multimedia Interface (HDMI)
 - DisplayPort
 - Digital visual interface (DVI)
 - Video graphics array (VGA)
- Adapters
 - Bluetooth adapter
- Network cables
- Underminated network cable/connectors
- Alternating current (AC) adapters
- Optical drives
- Screws/standoffs
- Cases
- Maintenance kit
- Mice/keyboards
- Keyboard-video-mouse (KVM)
- Console cable
- Solid-state drive (SSD)

Tools

- Screwdriver
- Multimeter
- Wire cutters
- Punchdown tool
- Crimper
- Power supply tester
- Cable stripper
- Standard technician toolkit
- Electrostatic discharge (ESD) strap
- Thermal paste
- Cable tester
- Cable toner
- WiFi analyzer
- Serial advanced technology attachment (SATA) to USB connectors

Software

- OSs
 - Linux
 - Chrome OS
 - Microsoft Windows
 - macOS
 - Android
 - iOS
- Preinstallation environment (PE) disk/live compact disc (CD)
- Antivirus software
- Virtualization software
- Anti-malware
- Driver software
