

# CompTIA Tech+ Certification Exam Objectives

EXAM NUMBER: FC0-U71

# About the Exam

The CompTIA Tech+ exam will certify the successful candidate has the knowledge and skills required to identify and explain the basics of computing, IT infrastructure, applications, software development, database use, and security concepts. In addition, candidates will demonstrate the knowledge to install peripherals and configure web browsers and wireless networks. Further, this exam will assess the candidate's knowledge in the areas of troubleshooting theory and identification of basic security risks. This exam is designed as a pre-professional certification for candidates who are advanced end users and possibly pursuing professional-level certifications, such as A+ (and beyond) in the future.

#### EXAM DEVELOPMENT

CompTIA exams result from subject matter expert workshops and industry-wide survey results regarding the skills and knowledge required of an IT professional.

#### **CompTIA AUTHORIZED MATERIALS USE POLICY**

CompTIA Certifications, LLC is not affiliated with and does not authorize, endorse, or condone utilizing any content provided by unauthorized third-party training sites (aka "brain dumps"). Individuals who utilize such materials in preparation for any CompTIA examination will have their certifications revoked and be suspended from future testing in accordance with the CompTIA Candidate Agreement. In an effort to more clearly communicate CompTIA's exam policies on use of unauthorized study materials, CompTIA directs all certification candidates to the <u>CompTIA Certification Exam Policies</u>. Please review all CompTIA policies before beginning the study process for any CompTIA exam. Candidates will be required to abide by the <u>CompTIA Candidate Agreement</u>. If a candidate has a question as to whether study materials are considered unauthorized (aka "brain dumps"), they should contact CompTIA at <u>examsecurity@comptia.org</u> to confirm.

#### **PLEASE NOTE**

The lists of examples provided in bulleted format are not exhaustive lists. Other examples of technologies, processes, or tasks pertaining to each objective may also be included on the exam, although not listed or covered in this objectives document. CompTIA is constantly reviewing the content of our exams and updating test questions to be sure our exams are current, and the security of the questions is protected. When necessary, we will publish updated exams based on existing exam objectives. Please know that all related exam preparation materials will still be valid.

**CompTIA** 

### **TEST DETAILS**

Required exam	FC0-U71
Number of questions	
Types of questions	Multiple-choice
Length of test	
Recommended experience	High school students or non-IT professionals.
Passing Score	

#### **EXAM OBJECTIVES (DOMAINS)**

The table below lists the domains measured by this examination and the extent to which they are represented.

DOMA	IN	PERCENTAGE OF EXAMINATION
1.0	IT Concepts and Terminology	13%
2.0	Infrastructure	24%
3.0	Applications and Software	18%
4.0	Software Development Concepts	13%
5.0	Data and Database Fundamentals	13%
6.0	Security	19%
Total		100%

# 1.0 IT Concepts and Terminology

1.1

Explain the basics of computing.

- Input
- Processing
- Output
- Storage

# 12 Identify notational systems.

- Binary
- Hexadecimal
- Decimal
- Octal

# .3 Compare and contrast common units of measure.

- Storage unit
  - Bit
  - Byte
  - Kilobyte (KB)
  - Megabyte (MB)
  - Gigabyte (GB)
  - Terabyte (TB)
  - Petabyte (PB)

Throughput unit

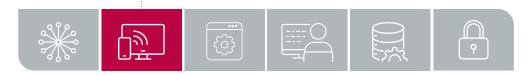

- Bits per second (bps)
- Kilobits per second (Kbps)
- Megabits per second (Mbps)
- Gigabits per second (Gbps) Terabytes per second (Tbps)
- Terabytes per second (Tbps)

### Processing speed

- Megahertz (MHz)
- Gigahertz (GHz)

- <sup>4</sup> Explain the troubleshooting methodology.
  - · Identify the problem.
  - Establish a theory of probable cause (question the obvious).
  - Research knowledge base/internet, if applicable.
  - Test the theory to determine the cause.
  - · Establish a plan of action to resolve the problem and implement the solution.
  - · Verify full system functionality and, if applicable, implement preventive measures.
  - · Document findings/lessons learned, actions, and outcomes.

# 2.0 Infrastructure

2.1

## Explain common computing devices and their purposes.

- Smartphones
- Tablets
- E-readers
- Laptops
- Workstations
- Servers
- Gaming consoles
- · Virtual reality systems
- · Augmented reality systems
- Internet of Things (IoT)
- Home appliances
- Home automation devices

- Thermostats
- Security systems
- Home assistants
- Deadbolts/door locks
- Video doorbells
- Vehicles
- Internet Protocol (IP)/security cameras
- Streaming media devices

Network interface card (NIC)

Onboard vs. expansion card

- Wired vs. wireless

- Medical devices
- Exercise equipment
- Wearable devices

# Explain the purpose of common internal computing components.

- · Motherboard/system board
- Firmware/basic input/output system (BIOS)
- · Random-access memory (RAM)
- Central processing unit (CPU)
- Graphics processing unit (GPU)

#### 2.3 Compare and contrast storage types.

- · Volatile vs. non-volatile
- Local storage
- RAM
- Read-only memory (ROM)
- Storage drive
  - Magnetic disks/hard disk drive (HDD)
  - Solid-state drive (SSD)
  - Non-volatile memory express (NVMe)
- Devices
- Printer
- Keyboard
- Mouse
- Web camera

- Optical

Storage

- External flash drives
- Local network storage
  - Network-attached storage (NAS)
  - File server
- Cloud storage service
- Given a scenario, install and configure common peripheral devices.

  - Scanner

  - External drive
  - Speakers/headset
  - Display

- Smart TV
- Projector
- Monitor
- Uninterruptable power supply (UPS)
- Installation types
  - Plug-n-play vs. driver installation
  - Other required steps
- IP-based peripherals
- Web-based configuration steps

# Compare and contrast common types of input/output device interfaces.

#### Networking

- Wired
  - Ethernet connector (RJ45)
  - Fiber connector small form-factor pluggable (SFP)
- Wireless
  - Bluetooth
  - Near-field communication (NFC)
  - □ 802.11X
- Networking devices and tools
  - Crimpers
  - Cable testers
- Peripheral devices
- USB (A/B/C)

- Compare and contrast virtualization and cloud technologies.
  - Virtualization
    - Hypervisor
    - Guest operating system (OS)
  - Cloud concepts
  - Platform as a Service (PaaS)
  - Infrastructure as a Service (laaS)
  - Software as a Service (SaaS)

# Compare and contrast common internet service types.

- Fiber optic
- Cable
- Digital subscriber line (DSL)

- Identify basic networking concepts. Basics of network communication
- Network identifiers
- IP address
- Media access control (MAC) address
- Ports
- Basic network services
- Secure web browsing
- File transfer
- Email
- Networking devices
  - Modem

# Explain the basic capabilities of a small wireless network.

- 802.11n/ac/ax
- Speed considerations
- Interference and attenuation factors
- Older vs. newer standards

## Band options

- 2.4GHz
- 5GHz
- 6GHz

## · Deployment models

- On premises

- Thunderbolt

Bluetooth

- Lightning

· Display ports

- DisplayPort

· Display technology

- USB-C

- Mirroring

- Casting

Radio frequency (RF)

- Video Graphics Array (VGA)

Digital Visual Interface (DVI)

- High Definition Media Interface (HDMI)

- Cloud
- Hybrid

CompTIA Tech+ FC0-U71 Certification Exam: Exam Objectives Version 1.1 Copyright © 2024 CompTIA, Inc. All rights reserved.

### Wireless - RF

- Satellite
- Cellular

## Router

- Switch
- Access point
- Firewall
- · Networking models
  - Client/server
- Peer-to-peer
- Local area network (LAN)
- Wide area network (WAN)

# 3.0 Applications and Software

# <sup>3.1</sup> Identify components of an OS.

- Filesystem characteristics
- Compression
- Encryption
- Types and extensions
- File management
- Folders/directories

- Permissions
- Naming restrictions
- · System applications and utilities
- Services
- Processes

Access control

- Mobile device - Desktop/workstation

Drivers

OS types

- Server - Embedded

- Interfaces
  - Console/command line
- Graphical user interface (GUI)
- File attributes and properties
- Explain the purpose of operating systems.
  - · Interface between applications and hardware
  - Disk management
  - Task and process management
  - Application management
  - Device management

#### 3.3 Explain the purpose and proper use of software.

- Productivity software
- Word processing
- Spreadsheet
- Presentation
- Visual diagramming

## Given a scenario, configure and use web browser features.

- Private browsing
- Browser add-ons/extensions
- Add
- Remove
- Enable/disable
- · Caching/clearing cache
- Pop-up blockers
- · Compatible browser for application(s)

#### 3.5 Identify common uses of artificial intelligence (AI).

- · Al chatbots
- Al assistants
- Generative AI
  - Al-generated code
  - Al-generated content
- · AI predictions and suggestions

- Collaboration software
  - Email client
  - Conferencing **Online workspace**
  - Document sharing
- Instant messaging software

Complia

- Web-browsing software

- · Profile synchronization
- Organizing features
- Bookmarks
- Default search engine
- Password management
- Accessibility
- Appearance

· Remote support software

# 4.0 Software Development Concepts

<sup>4.1</sup> Compare and contrast programming language categories.

#### Interpreted

- Scripting languages
- Markup languages
- Compiled programming languages
- Query languages
- Assembly languages

<sup>4.2</sup> Identify fundamental data types and their characteristics.

- Char
- Strings
- Numbers
- Integers
- Floats
- Boolean

<sup>4.3</sup> Explain the purpose and use of programming concepts.

- Identifiers
- Variables
- Constants
- Arrays
- Functions
- Objects
  - Properties
- Attributes
- Methods

Identify programming organizational techniques and logic concepts.

- Organizational techniques
  - Pseudo code concepts
- Object-oriented methods
- Comments and documentation
- Flow chart concepts
- Sequence
- Logic concepts
  - Branching
- Looping

# 5.0 Data and Database Fundamentals

# <sup>5.1</sup> Explain the value of data and information.

- · Data and information as an asset
  - Critical vs. non-critical data
- Data-driven business decisions
- Data capture and collection
- Data correlation

- Meaningful reporting
- · Data monetization
- · Data analytics
- · Big Data

## Explain database concepts and the purpose of a database.

- Database uses
- Create
- Import/input
- Query
- Reports
- Flat file vs. database
- Multiple concurrent users
- Scalability

5.3

# Compare and contrast various database structures.

- Structured vs. semistructured vs. non-structured
- Relational databases
- Schema
- Tables
  - Rows/records
  - Fields/columns
    - (i) Primary key
    - (ii) Foreign key
  - Constraints

# Explain basic data backup concepts.

- Data
- File backups
- System backups Restoring data
- Location
- Stored locally
  - Flash drive
  - External hard drive
  - Secure digital (SD) card
- Cloud storage

- Speed
- Variety of data
- · Database records
- Storage
- Data persistence
- Data availability
- Cloud vs. local
- Online vs. offline
- Non-relational databases
- Key/value databases
- Document databases

# 6.0 Security

## Explain fundamental security concepts and frameworks.

- · Confidentiality, integrity, and availability
- Privacy
- Social networking sites
- Email \_
- File sharing
- Instant messaging
- Personally identifiable information (PII)
- Government regulations (e.g., General Data Protection Regulations [GDPR])
- Cookie consent
- · Authentication, authorization, accounting, and non-repudiation concepts

## Authentication

- Single factor Multifactor
- Single sign-on
- Authorization
- Permissions
  - (i) Administrator vs. user accounts

Open source vs. proprietary

Subscription vs. one-time

purchase vs. perpetual

Researching and validating

Software sources

legitimate sources

Application stores

Product keys and serial numbers

Original equipment manufacturer

- Least privilege model
- Accounting
  - Logs
  - Location tracking Web browser history

# Explain methods to secure devices and security best practices.

- Security awareness
- Social engineering
  - Phishing
- Malicious or compromised content
- Securing devices (mobile/workstation)
- Authentication
- Anti-malware
- Firewall
- Patching/updating
- Physical device security
  - Cable locks
  - USB locks
- · Device use best practices
  - Licensing

# Explain password best practices.

- · Password length
- · Password complexity
- Password history
- · Password expiration
- · Password reuse across sites

- · Password managers
- Password privacy
- Password reset process
- · Changing default usernames and passwords
- · Enabling passwords

## Identify common use cases for encryption.

- · Plain text vs. cipher text
- Data at rest
  - File level
  - \_ Disk level
  - Mobile device

- Data in transit
  - Email
  - HTTPS
  - VPN
  - Mobile application

- Malicious
- Software piracy
- · Safe browsing practices
  - Certificates
  - Valid
- Invalid
- Privacy considerations
  - Social networking sites

CompTIA

- Email
- File sharing
- Instant messaging
- AI

CompTIA Tech+ FC0-U71 Certification Exam: Exam Objectives Version 1.1 Copyright © 2024 CompTIA, Inc. All rights reserved.

Removal of software • Unwanted

websites

- Unnecessary
- (OEM) websites vs. third-party

<sup>6.5</sup> Given a scenario, configure security settings for a small wireless network.

- Changing the service set identifier (SSID)
- Changing the default password
- Encrypted vs. unencrypted
- Open
- Pre-shared key
- Wireless Protected Access (WPA)
- Wireless Protected Access 2 (WPA2)
- Wireless Protected Access 3 (WPA3)

# CompTIA Tech+ FC0-U71 Acronym List

The following is a list of acronyms that appears on the CompTIA Tech+ FC0-U71 exam. Candidates are encouraged to review the complete list and attain a working knowledge of all listed acronyms as part of a comprehensive exam preparation program.

Acronym	Spelled Out	Acronym	Spelled Out
AI	Artificial Intelligence		
ARM	Advanced RISC Machines	HTML	Hypertext Markup Language
BD-ROM	Blu-ray Disc Read-only Memory	HTTP	Hypertext Transfer Protocol
BIOS	Basic Input/Output System	HTTPS	Hypertext Transfer Protocol over Secure Sockets
BPS	Bits Per Second		Layer
CAD	Computer-aided Design	laaS	Infrastructure as a Service
CAM	Computer-aided Manufacturing	IDE	Integrated Development Environment
CAN	Controller Area Network	IMAP	Internet Mail Access Protocol
CD	Compact Disc	IMAPS	Internet Mail Access Protocol Secure
CD-ROM	Compact Disc-Read-only Memory	loT	Internet of Things
CD-RW	Compact Disc-Rewritable	1P	Internet Protocol
CLI	Command-line Interface	IR	Infrared
CPU	Central Processing Unit	ISP	Internet Service Provider
DaaS	Desktop as a Service	Kb	Kilobit
DDR	Double Data Rate	KB	Kilobyte
DHCP	Dynamic Host Configuration Protocol	Kbps	Kilobit per second
DIMM	Dual Inline Memory Module	LAN	Local Area Network
DNS	Domain Name System	MAC	Media Access Control
DSL	Digital Subscriber Line	MAN	Metropolitan Area Network
DVD	Digital Video Disc	MB	Megabyte
DVD-R	Digital Video Disc-Recordable	Mb	Megabit
DVD-RW	Digital Video Disc-Rewritable	Mbps	Megabit per second
DVI	Digital Visual Interface	MHz	Megahertz
EMI	Electromagnetic Interference	MP3	Moving Picture Experts Group Layer-3 Audio
eSATA	External Serial Advanced Technology Attachment	MP4	Moving Picture Experts Group Layer-4
ESD	Electrostatic Discharge	NAS	Network Attached Storage
EULA	End User License Agreement	NFC	Near Field Communications
FTP	File Transfer Protocol	NIC	Network Interface Card
FTPS	File Transfer Protocol over Secure File Transfer	NvME	Non-volatile Memory Express
	Protocol	OEM	Original Equipment Manufacturer
Gb	Gigabit	OS	Operating System
GB	Gigabyte	PaaS	Platform as a Service
Gbps	Gigabit per second	PAN	Personal Area Network
GDPR	General Data Protection Regulations	PB	Petabyte
GHz	Gigahertz	PC	Personal Computer
GPS	Global Positioning System	PCI	Peripheral Component Interconnect
GPU	Graphics Processing Unit	PCle	Peripheral Component Interconnect Express
GUI	Graphical User Interface	PHI	Personal Health Information
HDD	Hard Disk Drive	PII	Personally Identifiable Information
HDMI	High-definition Multimedia Interface	PIN	Personal Identification Number

# CompTIA Tech+ FC0-U71 Hardware and Software List

CompTIA has included this sample list of hardware and software to assist candidates as they prepare for the Tech+ FCO-U71 certification exam. This list may also be helpful for training companies that wish to create a lab component for their training offering. The bulleted lists below each topic are sample lists and are not exhaustive.

#### Equipment

- Workstations
- Laptop
- · Home wireless router
- · Modem for internet service (WAN connection)
- · Basic printer
- External storage devices
  - Hard drive
  - Solid state drive
- Tablet/smartphone
- Surge protector/UPS
- Physical networking devices
  - Switch (unmanaged)
- Wireless headphones
- · Casting devices
- Smart TV/monitor
- Webcams/IP cameras
- Speakers

#### Spare parts/hardware

- · Flash drive (for backup)
- · Various cable types
- Keyboards
- Computer mice

#### Tools

- Electrostatic discharge (ESD) wristband (for demonstration)
- · Internet connectivity
- Crimper
- · Cable tester

### Software

- OS media
- Windows
- Linux
- Unconfigured OS images
- Anti-malware software
- Productivity software (local vs. cloud)
- Collaboration software
- Videoconferencing software
- Browser software
- Backup software
- Database software
- Software development packages (Integrated development environment [IDE])
- Cloud accounts for demonstration purposes: virtual central processing unit (vCPU), virtual random-access memory (vRAM), etc.
- Virtualization software
